

Quality policy

EnBW Sverige AB's mission is to be a committed operator and developer of renewable energy by being reliable, powerful, sustainable, capable of change and work together with stakeholders in good partnerships. Our aim is to be the natural local partner with international expertise for our stakeholders. We are a reliable and long-term partner who stay in a project for the entire lifetime, from project development to end of operations.

EnBW Sverige AB meets customer needs, requirements and expectations for the full value chain from development to service and operation of wind turbines and solar parks. To meet these requirements, we have quality objectives where we measure availability, service in time and customer satisfaction.

With competent, flexible and committed employees, EnBW Sverige AB is a strong driving force in the Nordic energy community. We expect all our employees to use their full potential to serve our customers and achieve our goals.

EnBW Sverige AB has a corporate culture that stimulates customer orientation, trust and flexibility.

All employees work continuously on improving our services, products and processes to ensure customer satisfaction and good profitability. This is done by striving for high availability for the wind turbine generators and always perform the service on time.

Mads Miltersen
Chief Executive Officer
EnBW Sverige AB
